Defects found during testing were fixed and retested before the final run.

ID	Severity	Description	Status
D-01	Low	UT_ALLOC_05 failed now and then: on SQLite the losing thread retried without waiting and could run out of retries while the other thread held the lock.	Fixed: 50 ms wait between retries
D-02	Medium	Custom 403, 404 and 500 pages required by SAD 3.4 were missing.	Fixed; covered by IT_SEC_02
D-03	Low	Student home page showed the room as a single line; SAD 3.5 asks for an allocation card.	Fixed; covered by IT_STAT_01

6. Conclusion

All 204 automated tests and all 48 unit and integration test cases passed. The exit criteria for unit and integration testing in the STP (all cases executed, no open Critical or High defects, coverage target met) are met.
