Hostel Management System

Code Coverage Report

Final regression run, 11 November 2026. Team: Krish Mathur, Atharva Mihir Gore, Samyuktha, Tanishk Gowda.

1. Summary

Run date	11 November 2026
Code under test	feature/part3-testing (based on main at c7f9932 plus feature/student-home)
Environment	Windows 11, Python 3.11.9, Django 5.2.19, SQLite 3, coverage.py 7.17.2
Command	coverage run --branch --source=hostels,rooms,allocations,dashboard,accounts,students manage.py test; coverage report -m; coverage json
Application code	694 of 694 statements covered (100.0%)
Including test files	2379 of 2384 statements covered (99.8%); this is the figure CI checks
Target (STP 5, CI)	80% line coverage; met

Application code means the six Django apps without their test files and migrations. Migrations are generated by Django and test files exercise themselves, so the application figure is the meaningful one. The CI pipeline measures the whole source tree (including tests) and fails below 80%.

2. Line coverage by module (application code)

Module	Statements	Covered	Missed	Coverage
accounts	132	132	0	100.0%
allocations	244	244	0	100.0%
dashboard	19	19	0	100.0%
hostels	57	57	0	100.0%
rooms	103	103	0	100.0%
students	139	139	0	100.0%
Total	**694**	**694**	**0**	**100.0%**

3. Line coverage by file (application code)

File	Statements	Missed	Coverage	Missing lines
accounts/__init__.py	0	0	100%	-
accounts/decorators.py	25	0	100%	-
accounts/forms.py	24	0	100%	-
accounts/services.py	22	0	100%	-
accounts/urls.py	3	0	100%	-
accounts/validators.py	36	0	100%	-
accounts/views.py	22	0	100%	-
allocations/__init__.py	0	0	100%	-
allocations/forms.py	26	0	100%	-
allocations/models.py	42	0	100%	-
allocations/services.py	78	0	100%	-
allocations/urls.py	4	0	100%	-
allocations/views.py	94	0	100%	-
dashboard/__init__.py	0	0	100%	-
dashboard/urls.py	4	0	100%	-
dashboard/views.py	15	0	100%	-

File	Statements	Missed	Coverage	Missing lines
hostels/__init__.py	0	0	100%	-
hostels/forms.py	13	0	100%	-
hostels/models.py	11	0	100%	-
hostels/urls.py	4	0	100%	-
hostels/views.py	29	0	100%	-
rooms/__init__.py	0	0	100%	-
rooms/api.py	10	0	100%	-
rooms/forms.py	8	0	100%	-
rooms/models.py	33	0	100%	-
rooms/urls.py	4	0	100%	-
rooms/views.py	48	0	100%	-
students/__init__.py	0	0	100%	-
students/admin.py	6	0	100%	-
students/forms.py	37	0	100%	-
students/models.py	25	0	100%	-
students/services.py	25	0	100%	-
students/urls.py	4	0	100%	-
students/views.py	42	0	100%	-

4. Lines not covered (whole source tree)

File	Lines	Why
accounts/tests.py	193, 204, 228, 239	Bodies of dummy views passed to the decorator tests; the decorator rejects the request before the view runs, which is what those tests assert.
allocations/tests.py	290	Fallback in UT_ALLOC_05 that records 'gave-up' if a thread never got the database lock; not reached because both threads always finish.

No application code line is left uncovered.
